

THE ECONOMICS OF PUBLIC POLICY ISSUES

Economics plays a central role in shaping every aspect of society. This course examines a series of prominent policy issues with economics at their core. We will explore the origins of these issues, the underlying data and evidence, and the policy tools available to address them. Each lecture will be standalone, delivered by a subject matter expert with a Ph.D. in economics. Potential topics include climate change, healthcare economics, economic inequality, and more, with final selections based on the most relevant and timely issues at the start of the course.
